Trex® & LEED® Green Building Rating System™

Trex is a proud member of the U.S. Green Building Council (USGBC), which is the nation's foremost coalition of leaders from every sector of the building industry. Leadership in Energy and Environmental Design (LEED), developed in part by USGBC, is a third party certification program and the nationally accepted benchmark for the design, construction and operation of high performance green buildings.

LEED is a point-based system and grades projects that are able to satisfy specific green building criteria. Products can contribute to points under the rating system since LEED criteria are performance-based and the categories for which Trex products can contribute are listed below.

MATERIALS & RESOURCES:

Credit 4.1	Recycled Content: 10%	1 point
Credit 4.2	Recycled Content: 20% (Trex products contain 95% recycled-content)	1 point
Credit 5.1	Regional Materials: 10%	1 point
Credit 5.2	Regional Materials: 20%	1 point

INNOVATION IN DESIGN:

Credit 1	LEED Innovation Credit	1 point
----------	------------------------	---------

Trex and LEED certified projects blend environmental, economic and occupant-oriented performance. Both cost less to operate and maintain, are healthier and safer for occupants and are a physical demonstration of the core values of the organizations that own and produce them.
